

# High Dynamic Response Digital Display Type Rigid Rod Type Liquid Level Sensor

## Specifications :

Price	Contact Us
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 working days.

## Detail Introduction :

### Application?

Product features and applications: The outer part of the flexible measuring rod is equipped with a translucent anti-corrosion sheath to enhance the product's resistance in corrosive environments.

Product features: LG series digital display meter head liquid level sensor, specially designed for applications with on-site digital display requirements.

When measuring a large range of liquid level (5-22 meters), a flexible measuring rod can be selected to avoid difficulties in installation and transportation caused by a large range.

Accuracy (according to BFSL):  $<\pm 0.01\%FS$  (minimum  $\pm 50m$ ) Optional: 0~20mA, 4~20mA; 0~10V, -10~+10V or SSI output

### Specification:

<b>Accuracy (according to BFSL):</b>	$<\pm 0.01\%FS$ (minimum $\pm 50m$ )
<b>Output signal:</b>	0~20mA, 4~20mA; 0~10V, -10~+10V or SSI output
