

New Design High Accuracy Walking Machinery Heavy-duty Type Widely Used

Specifications :

Price	Contact Us
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 working days.

Detail Introduction :

Main features and applications:

Widely used in construction machinery, power machinery, metallurgy, shield tunneling and other industries.

Refresh frequency 1200mm stroke is 0.5ms / 2400 mm stroke is 1.0ms 4800mm stroke is 2.ms / 7600mm stroke is 5.0ms

Withstand voltage rating 350bar / 600bar peak repetition accuracy $\pm 0.005\%$ FS suitable for high speed Real-time measurement and control of hydraulic movement (10m/s) system.

Product features: Gb series products have compact structure, strong anti-interference ability, fully enclosed anti-pollution, anti- Special advantages such as oil and waterproof (steam).

Accuracy (according to BFS): $< \pm 0.01\%$ FS (minimum $\pm 50\mu\text{m}$)

Analog output: 0~20mA, 4~20mA; 0~10V, -10~+10V or SSI output CANopen
