

0.5-4.5V Customized High Precision Intelligent Digital Pressure Switch For Air Compressor

Specifications :

Price	Contact Us
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 working days.

Detail Introduction :

Application?

The equipment displays and outputs one analog quantity and two switching quantities on site, which are widely used in hydraulic, water, electricity and tap water industries. 330°rotating display head can ensure a better observation angle under different installation methods. It is a high-quality Pressure Transmitters & Sensors.

Main features:

Rated capacity: 0...0.1...1000bar

Accuracy (according to BFSL): 0.5% FSO

Optional: stainless steel protective shell, PNP, NPN load 1.2A output; optional analog signal 4...20mA

Features and applications: On-site display and output of one analog quantity and two switching quantities are widely used in hydraulic, water, electricity, tap water and other industries

Specification:

Specification table

Measuring range	0...0.1...1000bar
Accuracy (according to BFSL)	±0.5%FS
Output signal	4...20mA/ PNP; NPN load 1.2A output
