

Stable And Reliable Dynamic Torque Sensor Suitable For Low-speed Measurement

Specifications :

Price	Contact Us
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 working days.

Detail Introduction :

Main features:

Wear parts such as resistance strain sensitive element collecting rings.
Suitable for low-speed measurement,
Output positive and negative torque signal Both ends are keyed
The maximum speed does not exceed 400 rpm.

Specification:

Product features: an integrated product composed of resistance strain sensitive components and integrated circuits

Accuracy (according to BFSL): $<\pm 0.5$; 0.3%FS

Range and output: range: 100~3000N.m~ output: 1~2mv/v 0~ ± 10 V, RS485, etc.
