

Non-contact Dynamic Torque Sensor Large Range Square Motor

Specifications :

Price	Contact Us
Payment Terms	T/T, L/C, Western Union, etc.
Delivery Detail	10-25 working days.

Detail Introduction :

Application:

It is suitable for torque test, cylinder valve tightening test, screw machine, electric tools, etc.

Specification:

High precision, stable and reliable performance. $\pm 0.5\%$; 0.3%FS

Measuring range 5Nm, 10Nm...20,000 N.m (other measuring ranges can be customized)

No wearing parts, long life, maximum speed does not exceed 8000rpm

Output pulse signal 5~15kHz; or built-in amplifier output RS485; 4-20mA, etc.

The maximum speed is 8000~15000 rpm.
